

15th International Workshop On Micropiles
The Sebastian | Vail, Colorado
May 31-June 2, 2023

CALL FOR ABSTRACTS

Abstracts are solicited on the following micropile topics:

- Innovations
- State of Practice and Research
- Seismic Design
- Numerical Analysis
- Codes and Guidance Specifications
- Durability and Design Life
- Micropile/Structure Connection Details
- Load Testing
- Equipment and Material Evolutions
- Construction Challenges
- Difficult Ground (Groundwater/Karst)
- Case Histories and Lessons Learned
- Landslide Prevention/Slope Stabilization
- Historic Renovation
- Energy Piles

Please submit an abstract (300 words) for consideration by the Program Committee summarizing your proposed presentation content to <https://tinyurl.com/ISM2023-CFA>.

Papers are not required for this 15th workshop. Submission of an abstract confirms you will accept an invitation to present in person at the workshop. The Program Committee will review abstract submissions and select speakers.

Key Dates:

- **Abstracts Due:**
Monday, October 10, 2022
- **Acceptance of Abstracts:**
Monday, October 24, 2022
- **Presentations Due:**
Monday, May 22, 2023

Authors will be asked to submit electronic versions of oral presentations for inclusion in the Workshop Proceedings.
