

**15th International Workshop On Micropiles**  
**The Sebastian | Vail, Colorado**  
**May 31-June 2, 2023**

## SPONSORSHIP OPPORTUNITIES

The International Society for Micropiles (ISM) is hosting its 15th International Workshop on Micropiles on May 31 – June 2, 2023, at The Sebastian in Vail, Colorado. The theme of the workshop is “Taking Micropiles to New Heights.”

The workshop provides an opportunity for members to meet, present and exchange data, and share experiences and developments on a relatively informal basis. The workshop includes technical presentations covering states of practice; advancements of micropile construction, materials, research and development; and educational/promotional activities.

**Please consider becoming a sponsor for this highly regarded workshop. It’s an opportunity to “heighten” the exposure for your company, products and services before, during and after the workshop — and demonstrate your leadership in the development, advancement and promotion of micropile technology.**

---

**Interested?** Pledge your support at [www.ismicropiles.org](http://www.ismicropiles.org) or contact ISM Executive Director: Mary Ellen Bruce Large, P.E., D.GE, Nicholson Construction Company at [melarge@ismicropiles.org](mailto:melarge@ismicropiles.org).
